WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

C42 (upland plot)

Project Site: A1B2 City/County: Gardner / Worcester State: MA Samp. Date: 10/7/2020
 Applicant/Owner: National Grid State: MA Sampling Point: C42 (upland plot)
 Investigator(s): Emily Martin Section, Township, Range: Gardner
 Landform (hillslope, terrace, etc.): Depression Local relief (concave, convex, none): Concave Slope (%): 3-5%
 Subregion (LRR or MLRA): LRR Lat: 42.57609 Long: -71.95189 Datum: _____
 Soil Map Unit: Peru-Marlow association NWI Class: PSS
 Are climatic/hydrologic conditions on the site typical for this time of year? Yes Remarks: _____
 Are Normal Circumstances present? Yes If needed, explain any answers in Remarks: _____
 Are Vegetation Yes, Soil No, or Hydrology No significantly disturbed? Remarks: Maintained utility row
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks: _____

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	<u>No</u>	Is This Sample Area Within a Wetland?	<u>No</u>
Hydric Soil Present?	<u>No</u>		
Wetland Hydrology Present?	<u>No</u>		
Remarks: _____

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

C-16-UPL

Project Site: A1B2 City/County: Westminster / Worcester Samp. Date: 11/1/2020
Applicant/Owner: National Grid State: MA Sampling Point: C-16-UPL
Investigator(s): C. Cyrus Section, Township, Range: N/A
Landform (hillslope, terrace, etc.): Hillside Local relief (concave, convex, none): Convex Slope (%): 5-8%
Subregion (LRR or MLRA): LRR R Lat: 42.55992 Long: -71.91966 Datum: WGS 1984
Soil Map Unit: Peru-Marlow association, 3 to 15 percent slopes, extremely stony NWI Class: Upland
Are climatic/hydrologic conditions on the site typical for this time of year? Yes
Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
Are Vegetation Yes, Soil No, or Hydrology No significantly disturbed? Remarks: Transmission ROW
Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? No
Hydric Soil Present? No
Wetland Hydrology Present? No
Is This Sample Area Within a Wetland? No
Remarks: One or more parameters lacking. Area is not a jurisdictional wetland.

HYDROLOGY

Wetland Hydrology Indicators:
Primary Indicators (minimum of one is required; check all that apply)
Secondary Indicators (minimum of two required)
Surface Water (A1) Water-Stained Leaves (B9) Surface Soil Cracks (B6)
High Water Table (A2) Aquatic Fauna (B13) Drainage Patterns (B10)
Saturation (A3) Marl Deposits (B15) Moss Trim Lines (B16)
Water Marks (B1) Hydrogen Sulfide Odor (C1) Dry-Season Water Table (C2)
Sediment Deposits (B2) Oxidized Rhizospheres on Living Roots (C3) Crayfish Burrows (C8)
Drift Deposits (B3) Presence of Reduced Iron (C4) Saturation Visible on Aerial (C9)
Algal Mat or Crust (B4) Recent Iron Reduction in Tilled Soils (C5) Stunted or Stressed Plants (D1)
Iron Deposits (B5) Thin Muck Surface (C7) Geomorphic Position (D2)
Inundation Visible on Aerial (B7) Other (Explain in Remarks) Shallow Aquitard (D3)
Sparsely Vegetated Concave Surface (B8) FAC-Neutral Test (D5)
Field Observations:
Surface Water Present? Depth (inches): N/A Wetland Hydrology Present? No
Water Table Present? Depth (inches): N/A
Saturation Present? Depth (inches): N/A
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:
Remarks: No primary or secondary indicators of wetland hydrology present; parameter is not met.

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

Wetland B39 (upland plot)

Project Site: A1/B2 Line City/County: Westminster / Worcester Samp. Date: 8/21/2020
Applicant/Owner: National Grid State: MA Sampling Point: Wetland B39 (upland plot)
Investigator(s): Nicole Martin and Chris Wagner Section, Township, Range: Westminster
Landform (hillslope, terrace, etc.): Flat Local relief (concave, convex, none): None Slope (%): 3-5%
Subregion (LRR or MLRA): LRR Lat: 42.55418 Long: -71.88897 Datum: NAD 83
Soil Map Unit: Pillsbury-Peacham association, 0 to 8 percents slopes, extremely stony NWI Class:
Are climatic/hydrologic conditions on the site typical for this time of year? Yes Remarks:
Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
Are Vegetation No, Soil No, or Hydrology No significantly disturbed? Remarks:
Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes
Hydric Soil Present? No
Wetland Hydrology Present? No
Is This Sample Area Within a Wetland? No
Remarks: One or more parameters lacking. Area is not a jurisdictional wetland.

HYDROLOGY

Wetland Hydrology Indicators:
Primary Indicators (minimum of one is required; check all that apply)
Secondary Indicators (minimum of two required)
Surface Water (A1) Water-Stained Leaves (B9) Surface Soil Cracks (B6)
High Water Table (A2) Aquatic Fauna (B13) Drainage Patterns (B10)
Saturation (A3) Marl Deposits (B15) Moss Trim Lines (B16)
Water Marks (B1) Hydrogen Sulfide Odor (C1) Dry-Season Water Table (C2)
Sediment Deposits (B2) Oxidized Rhizospheres on Living Roots (C3) Crayfish Burrows (C8)
Drift Deposits (B3) Presence of Reduced Iron (C4) Saturation Visible on Aerial (C9)
Algal Mat or Crust (B4) Recent Iron Reduction in Tilled Soils (C5) Stunted or Stressed Plants (D1)
Iron Deposits (B5) Thin Muck Surface (C7) Geomorphic Position (D2)
Inundation Visible on Aerial (B7) Other (Explain in Remarks) Shallow Aquitard (D3)
Sparsely Vegetated Concave Surface (B8) FAC-Neutral Test (D5)
Microtopographic Relief (D4)

Field Observations:
Surface Water Present? Depth (inches): N/A
Water Table Present? Depth (inches): N/A
Saturation Present? Depth (inches): N/A
Wetland Hydrology Present? No
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:
Remarks: No primary or secondary indicators of wetland hydrology present; parameter is not met.

SOIL

Table with 9 columns: Depth (in), Matrix, Color (moist), %, Redox Features, Type, Loc, Texture, Remarks. Rows for 0-2, 2-7, and 7-15+ inch depths.

1 Type: C=Concentration, D=Depletion, RM=Reduced Matrix, MS=Masked Sand Grains. 2 Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators:
Histosol (A1) Polyvalue Below Surface (S8) (LRR R, MLRA 149B) 2 cm Muck (A10) (LRR K, L, MLRA 149B)
Histic Epipedon (A2) Thin Dark Surface (S9) (LRR R, MLRA 149B) Coast Prairie Redox (A16) (LRR K, L, R)
Black Histic (A3) Loamy Mucky Mineral (F1) (LRR K, L) 5 cm Mucky Peat or Peat (S3) (LRR K, L, R)
Hydrogen Sulfide (A4) Loamy Gleyed Matrix (F2) Dark Surface (S7) (LRR K, L, M)
Stratified Layers (A5) Depleted Matrix (F3) Polyvalue Below Surface (S8) (LRR K, L)
Depleted Below Dark Surface (A11) Redox Dark Surface (F6) Thin Dark Surface (S9) (LRR K, L)
Thick Dark Surface (A12) Depleted Dark Surface (F7) Iron-Manganese Masses (F12) (LRR K, L, R)
Sandy Mucky Mineral (S1) Redox Depressions (F8) Piedmont Floodplain Soils (F19) (MLRA 149B)
Sandy Gleyed Matrix (S4) Mesic Spodic (TA6) (MLRA 144A, 145, 149B)
Sandy Redox (S5) Red Parent Material (F21)
Stripped Matrix (S6) Very Shallow Dark Surface (TF12)
Dark Surface (S7) (LRR R, MLRA 149B) Other (Explain in Remarks)
3 Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

Wetland B37 (upland plot)

Project Site: A1/B2 Line City/County: Westminster / Worcester Samp. Date: 8/21/2020
Applicant/Owner: National Grid State: MA Sampling Point: Wetland B37 (upland plot)
Investigator(s): Nicole Martin and Chris Wagner Section, Township, Range: Westminster
Landform (hillslope, terrace, etc.): Hillside Local relief (concave, convex, none): None Slope (%): 8-12%
Subregion (LRR or MLRA): LRR Lat: 42.54851 Long: -71.87681 Datum: NAD 83
Soil Map Unit: Allagash fine sandy loam, 3 to 8 percent slopes NWI Class:
Are climatic/hydrologic conditions on the site typical for this time of year? Yes
Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
Are Vegetation No, Soil No, or Hydrology No significantly disturbed? Remarks:
Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? No
Hydric Soil Present? No
Wetland Hydrology Present? No
Is This Sample Area Within a Wetland? No
Remarks: One or more parameters lacking. Area is not a jurisdictional wetland.

HYDROLOGY

Wetland Hydrology Indicators:
Primary Indicators (minimum of one is required; check all that apply)
Secondary Indicators (minimum of two required)
Surface Water (A1) Water-Stained Leaves (B9) Surface Soil Cracks (B6)
High Water Table (A2) Aquatic Fauna (B13) Drainage Patterns (B10)
Saturation (A3) Marl Deposits (B15) Moss Trim Lines (B16)
Water Marks (B1) Hydrogen Sulfide Odor (C1) Dry-Season Water Table (C2)
Sediment Deposits (B2) Oxidized Rhizospheres on Living Roots (C3) Crayfish Burrows (C8)
Drift Deposits (B3) Presence of Reduced Iron (C4) Saturation Visible on Aerial (C9)
Algal Mat or Crust (B4) Recent Iron Reduction in Tilled Soils (C5) Stunted or Stressed Plants (D1)
Iron Deposits (B5) Thin Muck Surface (C7) Geomorphic Position (D2)
Inundation Visible on Aerial (B7) Other (Explain in Remarks) Shallow Aquitard (D3)
Sparsely Vegetated Concave Surface (B8) FAC-Neutral Test (D5)
Field Observations:
Surface Water Present? Depth (inches): N/A
Water Table Present? Depth (inches): N/A
Saturation Present? Depth (inches): N/A
Wetland Hydrology Present? No
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:
Remarks: No primary or secondary indicators of wetland hydrology present; parameter is not met.

Prevalence Index is <= 3.0

Problematic Hydrophytic Vegetation¹ (explain)

Rapid Test for Hydrophytic Vegetation

Morphological Adaptations

¹Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic.

Definitions of Vegetation Strata:

Tree - Woody plants, excluding woody vines, approximately 20ft (6m) or more in height and 3in (7.6cm) or larger in diameter at breast height (DBH).

Sapling - Woody plants, excluding woody vines, approximately 20ft (6m) or more in height and less than 3in (7.6cm) DBH.

Shrub - Woody plants, excluding woody vines, approximately 3 to 20ft (1 to 6m) in height.

Herb - All herbaceous (non-woody) plants, including herbaceous vines, regardless of size. Includes woody plants, except woody vines, less than approximately 3ft (1m) in height.

Woody vine - All woody vines, regardless of height.

Hydrophytic Vegetation Present? No

Remarks: (If observed, list morphological adaptations below).

Wetland B25 (wetland plot)

Project Site: A1/B2 Line City/County: Leominster / Worcester Samp. Date: 7/23/2020
 Applicant/Owner: National Grid State: MA Sampling Point: Wetland B25 (wetland plot)
 Investigator(s): Nicole Martin and Jay Quattrocchi Section, Township, Range: Leominster
 Landform (hillslope, terrace, etc.): Flat Local relief (concave, convex, none): Flat Slope (%): 1-2%
 Subregion (LRR or MLRA): LRR Lat: 42.53992 Long: -71.81078 Datum: NAD 83
 Soil Map Unit: Woodbridge fine sandy loam, 8 to 15 percent slopes, extremely stony NWI Class: PSS
 Are climatic/hydrologic conditions on the site typical for this time of year? Yes Remarks:
 Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? Remarks:
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? <u>Yes</u>	Is This Sample Area Within a Wetland? <u>Yes</u>
Hydric Soil Present? <u>Yes</u>	
Wetland Hydrology Present? <u>Yes</u>	

Remarks: All parameters are met. Area is classified as a palustrine scrub-shrub (PSS) wetland.

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)		Secondary Indicators (minimum of two required)	
<input type="checkbox"/> Surface Water (A1)	<input type="checkbox"/> Water-Stained Leaves (B9)	<input type="checkbox"/> Surface Soil Cracks (B6)	
<input type="checkbox"/> High Water Table (A2)	<input type="checkbox"/> Aquatic Fauna (B13)	<input checked="" type="checkbox"/> Drainage Patterns (B10)	
<input type="checkbox"/> Saturation (A3)	<input type="checkbox"/> Marl Deposits (B15)	<input type="checkbox"/> Moss Trim Lines (B16)	
<input type="checkbox"/> Water Marks (B1)	<input type="checkbox"/> Hydrogen Sulfide Odor (C1)	<input type="checkbox"/> Dry-Season Water Table (C2)	
<input type="checkbox"/> Sediment Deposits (B2)	<input type="checkbox"/> Oxidized Rhizospheres on Living Roots (C3)	<input type="checkbox"/> Crayfish Burrows (C8)	
<input type="checkbox"/> Drift Deposits (B3)	<input type="checkbox"/> Presence of Reduced Iron (C4)	<input type="checkbox"/> Saturation Visible on Aerial (C9)	
<input type="checkbox"/> Algal Mat or Crust (B4)	<input type="checkbox"/> Recent Iron Reduction in Tilled Soils (C5)	<input checked="" type="checkbox"/> Stunted or Stressed Plants (D1)	
<input type="checkbox"/> Iron Deposits (B5)	<input type="checkbox"/> Thin Muck Surface (C7)	<input checked="" type="checkbox"/> Geomorphic Position (D2)	
<input checked="" type="checkbox"/> Inundation Visible on Aerial (B7)	<input type="checkbox"/> Other (Explain in Remarks)	<input type="checkbox"/> Shallow Aquitard (D3)	
<input type="checkbox"/> Sparsely Vegetated Concave Surface (B8)		<input type="checkbox"/> Microtopographic Relief (D4)	
		<input type="checkbox"/> FAC-Neutral Test (D5)	

Field Observations:

Surface Water Present? <u> </u>	Depth (inches): <u>N/A</u>	Wetland Hydrology Present? <u>Yes</u>
Water Table Present? <u> </u>	Depth (inches): <u>N/A</u>	
Saturation Present? <u> </u>	Depth (inches): <u>N/A</u>	

Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

BSC Wetland LE-W23

C-13-WET

Project Site: A1B2 City/County: Leominster / Worcester Samp. Date: 10/30/2020
Applicant/Owner: National Grid State: MA Sampling Point: C-13-WET
Investigator(s): C. Cyrus and E. Martin Section, Township, Range: Leominster
Landform (hillslope, terrace, etc.): Hillside Local relief (concave, convex, none): Concave Slope (%): 3-5%
Subregion (LRR or MLRA): LRR R Lat: 42.49467 Long: -71.77479 Datum: WGS 1984
Soil Map Unit: Ridgebury fine sandy loam NWI Class: PSS
Are climatic/hydrologic conditions on the site typical for this time of year? Yes
Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
Are Vegetation Yes, Soil No, or Hydrology No significantly disturbed? Remarks: Transmission ROW
Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes
Hydric Soil Present? Yes
Wetland Hydrology Present? Yes
Is This Sample Area Within a Wetland? Yes
Remarks: All parameters are met. Area is classified as a palustrine scrub-shrub (PSS) wetland.

HYDROLOGY

Wetland Hydrology Indicators:
Primary Indicators (minimum of one is required; check all that apply)
Surface Water (A1) X Water-Stained Leaves (B9)
High Water Table (A2) Aquatic Fauna (B13)
X Saturation (A3) Marl Deposits (B15)
Water Marks (B1) Hydrogen Sulfide Odor (C1)
Sediment Deposits (B2) Oxidized Rhizospheres on Living Roots (C3)
Drift Deposits (B3) Presence of Reduced Iron (C4)
Algal Mat or Crust (B4) Recent Iron Reduction in Tilled Soils (C5)
Iron Deposits (B5) Thin Muck Surface (C7)
Inundation Visible on Aerial (B7) Other (Explain in Remarks)
Sparsely Vegetated Concave Surface (B8)
Secondary Indicators (minimum of two required)
Surface Soil Cracks (B6)
Drainage Patterns (B10)
Moss Trim Lines (B16)
Dry-Season Water Table (C2)
Crayfish Burrows (C8)
Saturation Visible on Aerial (C9)
Stunted or Stressed Plants (D1)
X Geomorphic Position (D2)
Shallow Aquitard (D3)
Microtopographic Relief (D4)
X FAC-Neutral Test (D5)
Field Observations:
Surface Water Present? Depth (inches): N/A
Water Table Present? Depth (inches): N/A
Saturation Present? X Depth (inches): Surface
Wetland Hydrology Present? Yes
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:
Remarks: At least one primary or two secondary indicators of wetland hydrology present; parameter is met.

Hydrophytic Vegetation Indicators:

Dominance Test is > 50%

Prevalence Index is <= 3.0

Problematic Hydrophytic Vegetation¹ (explain)

Rapid Test for Hydrophytic Vegetation

Morphological Adaptations

¹Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic.

Definitions of Vegetation Strata:

Tree - Woody plants, excluding woody vines, approximately 20ft (6m) or more in height and 3in (7.6cm) or larger in diameter at breast height (DBH).

Sapling - Woody plants, excluding woody vines, approximately 20ft (6m) or more in height and less than 3in (7.6cm) DBH.

Shrub - Woody plants, excluding woody vines, approximately 3 to 20ft (1 to 6m) in height.

Herb - All herbaceous (non-woody) plants, including herbaceous vines, regardless of size. Includes woody plants, except woody vines, less than approximately 3ft (1m) in height.

Woody vine - All woody vines, regardless of height.

Hydrophytic Vegetation Present? Yes

Remarks: (If observed, list morphological adaptations below).
 Indicator 1 (Rapid Test) is present; parameter is met. Dominance test is calculated for reference purposes only.

Indicator 2 (Dominance Test) present with >50% of dominant species across all vegetation strata FAC or wetter.

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

BSC Wetland LE-W32

C-5C-UPL

Project Site: A1B2 City/County: Leominster / Worcester Samp. Date: 11/3/2020
Applicant/Owner: National Grid State: MA Sampling Point: C-5C-UPL
Investigator(s): C. Cyrus Section, Township, Range: N/A
Landform (hillslope, terrace, etc.): Hillside Local relief (concave, convex, none): Convex Slope (%): 5-8%
Subregion (LRR or MLRA): LRR R Lat: 42.48580 Long: -71.76223 Datum: WGS 1984
Soil Map Unit: Hinckley loamy sand, 25 to 35 percent slopes NWI Class: Upland
Are climatic/hydrologic conditions on the site typical for this time of year? Yes
Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
Are Vegetation Yes, Soil Yes, or Hydrology No significantly disturbed? Remarks: Transmission ROW, compaction from construction
Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? No
Hydric Soil Present? No
Wetland Hydrology Present? No
Is This Sample Area Within a Wetland? No
Remarks: One or more parameters lacking. Area is not a jurisdictional wetland.

HYDROLOGY

Wetland Hydrology Indicators:
Primary Indicators (minimum of one is required; check all that apply)
Secondary Indicators (minimum of two required)
Surface Water (A1) Water-Stained Leaves (B9) Surface Soil Cracks (B6)
High Water Table (A2) Aquatic Fauna (B13) Drainage Patterns (B10)
Saturation (A3) Marl Deposits (B15) Moss Trim Lines (B16)
Water Marks (B1) Hydrogen Sulfide Odor (C1) Dry-Season Water Table (C2)
Sediment Deposits (B2) Oxidized Rhizospheres on Living Roots (C3) Crayfish Burrows (C8)
Drift Deposits (B3) Presence of Reduced Iron (C4) Saturation Visible on Aerial (C9)
Algal Mat or Crust (B4) Recent Iron Reduction in Tilled Soils (C5) Stunted or Stressed Plants (D1)
Iron Deposits (B5) Thin Muck Surface (C7) Geomorphic Position (D2)
Inundation Visible on Aerial (B7) Other (Explain in Remarks) Shallow Aquitard (D3)
Sparsely Vegetated Concave Surface (B8) FAC-Neutral Test (D5)
Field Observations:
Surface Water Present? Depth (inches): N/A Wetland Hydrology Present? No
Water Table Present? Depth (inches): N/A
Saturation Present? Depth (inches): N/A
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:
Remarks: No primary or secondary indicators of wetland hydrology present; parameter is not met.

SOIL

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)
Depth Matrix Redox Features
(in) Color (moist) % Color (moist) % Type1 Loc2 Texture Remarks
0-4 10YR_4/4 100 N/A N/A N/A GRAVELLY_LOAM Auger refusal at 4in
1Type: C=Concentration, D=Depletion, RM=Reduced Matrix, MS=Masked Sand Grains. 2Location: PL=Pore Lining, M=Matrix.
Hydric Soil Indicators:
Indicators for Problematic Hydric Soils3:
Histosol (A1) Polyvalue Below Surface (S8) (LRR R, MLRA 149B) 2 cm Muck (A10) (LRR K, L, MLRA 149B)
Histic Epipedon (A2) Thin Dark Surface (S9) (LRR R, MLRA 149B) Coast Prairie Redox (A16) (LRR K, L, R)
Black Histic (A3) Loamy Mucky Mineral (F1) (LRR K, L) 5 cm Mucky Peat or Peat (S3) (LRR K, L, R)
Hydrogen Sulfide (A4) Loamy Gleyed Matrix (F2) Dark Surface (S7) (LRR K, L, M)
Stratified Layers (A5) Depleted Matrix (F3) Polyvalue Below Surface (S8) (LRR K, L)
Depleted Below Dark Surface (A11) Redox Dark Surface (F6) Thin Dark Surface (S9) (LRR K, L)
Thick Dark Surface (A12) Depleted Dark Surface (F7) Iron-Manganese Masses (F12) (LRR K, L, R)
Sandy Mucky Mineral (S1) Redox Depressions (F8) Piedmont Floodplain Soils (F19) (MLRA 149B)
Sandy Gleyed Matrix (S4) Mesic Spodic (TA6) (MLRA 144A, 145, 149B)
Sandy Redox (S5) Red Parent Material (F21)
Stripped Matrix (S6) Very Shallow Dark Surface (TF12)
Dark Surface (S7) (LRR R, MLRA 149B) Other (Explain in Remarks)
Restrictive Layer (if observed):
Type: Gravel Hydric Soil Present? No
Depth (inches): 4
Remarks: No hydric soil indicators present and soil does not meet NTCHS definition of hydric soil; parameter is not met.

VEGETATION - Use scientific names of plants.

Sampling Point: C-5C-UPL

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

BSC Wetland ST-W1

C-2-UPL

Project Site: A1B2 City/County: Sterling / Worcester Samp. Date: 11/3/2020
Applicant/Owner: National Grid State: MA Sampling Point: C-2-UPL
Investigator(s): C. Cyrus Section, Township, Range: N/A
Landform (hillslope, terrace, etc.): Hillside Local relief (concave, convex, none): Convex Slope (%): 15-20%
Subregion (LRR or MLRA): LRR R Lat: 42.47693 Long: -71.74595 Datum: WGS 1984
Soil Map Unit: Woodbridge fine sandy loam, 0 to 8 percent slopes, very stony NWI Class: Upland
Are climatic/hydrologic conditions on the site typical for this time of year? Yes
Are Normal Circumstances present? Yes If needed, explain any answers in Remarks:
Are Vegetation Yes, Soil Yes, or Hydrology No significantly disturbed? Remarks: Transmission ROW within active construction site
Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks:

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present? No
Hydric Soil Present? No
Wetland Hydrology Present? No
Is This Sample Area Within a Wetland? No
Remarks: One or more parameters lacking. Area is not a jurisdictional wetland.

HYDROLOGY

Wetland Hydrology Indicators:
Primary Indicators (minimum of one is required; check all that apply)
Surface Water (A1) Water-Stained Leaves (B9)
High Water Table (A2) Aquatic Fauna (B13)
Saturation (A3) Marl Deposits (B15)
Water Marks (B1) Hydrogen Sulfide Odor (C1)
Sediment Deposits (B2) Oxidized Rhizospheres on Living Roots (C3)
Drift Deposits (B3) Presence of Reduced Iron (C4)
Algal Mat or Crust (B4) Recent Iron Reduction in Tilled Soils (C5)
Iron Deposits (B5) Thin Muck Surface (C7)
Inundation Visible on Aerial (B7) Other (Explain in Remarks)
Sparsely Vegetated Concave Surface (B8)
Secondary Indicators (minimum of two required)
Surface Soil Cracks (B6)
Drainage Patterns (B10)
Moss Trim Lines (B16)
Dry-Season Water Table (C2)
Crayfish Burrows (C8)
Saturation Visible on Aerial (C9)
Stunted or Stressed Plants (D1)
Geomorphic Position (D2)
Shallow Aquitard (D3)
Microtopographic Relief (D4)
FAC-Neutral Test (D5)
Field Observations:
Surface Water Present? Depth (inches): N/A
Water Table Present? Depth (inches): N/A
Saturation Present? Depth (inches): N/A
Wetland Hydrology Present? No
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:
Remarks: No primary or secondary indicators of wetland hydrology present; parameter is not met.

WETLAND DETERMINATION DATA FORM - Northcentral and Northeast Region

BSC Wetland ST-W2

Wet plot wetland C1

Project Site: A1/B2 City/County: Sterling / Worcester Samp. Date: 5/19/2020
 Applicant/Owner: National Grid State: MA Sampling Point: Wet plot wetland C1
 Investigator(s): T. Sullivan and E. Martin Section, Township, Range: Sterling
 Landform (hillslope, terrace, etc.): Depression Local relief (concave, convex, none): Flat Slope (%): 1-2%
 Subregion (LRR or MLRA): LRR Lat: 42.47379 Long: -71.74101 Datum: GCS WGS 1984
 Soil Map Unit: Ridgebury Fine sandy loam NWI Class: PEM

Are climatic/hydrologic conditions on the site typical for this time of year? Yes Remarks: _____
 Are Normal Circumstances present? Yes If needed, explain any answers in Remarks: _____
 Are Vegetation Yes, Soil No, or Hydrology No significantly disturbed? Remarks: Maintained utility ROW
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? Remarks: _____

SUMMARY OF FINDINGS - Attach site map showing sample point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	<u>Yes</u>	Is This Sample Area Within a Wetland?	<u>Yes</u>
Hydric Soil Present?	<u>Yes</u>

Photo #47 Stream 12	Location: Warwick, MA
	Description: Stream 12 near flag BF G12-200
Photo #48 Wetland 38	Location: Warwick, MA
	Description: Wetland 38 near flag WF G64-301

Photo #49 Wetland 39	Location: Warwick, MA
	Description: Wetland 39 near flag WF G63-101
Photo #50 Wetland 40	Location: Warwick, MA
	Description: Interior photo of Wetland 40
Photo #51 Wetland 41	Location: Warwick, MA
	Description: Wetland 41 near flag WF G61-203

Photo #52 Wetland 42	Location: Warwick, MA
 A photograph showing a wetland area with dense green vegetation and tall grasses. A survey flag is visible in the middle ground.	Description: Wetland 42 near flag WF G60-115
Photo #53 Stream 14	Location: Warwick, MA
 A photograph of a stream flowing over large, moss-covered rocks. The surrounding area is lush with green foliage.	Description: Stream 10 near flags BF G10-303 and 403
Photo #54 Wetland 43	Location: Warwick, MA
 A photograph showing a dense thicket of green and yellowish vegetation, likely a wetland area. A survey flag is visible in the center.	Description: Interior photo near Wetland 43

Photo #55 Wetland 44	Location: Warwick, MA
 A photograph showing a dense thicket of wetland vegetation. In the foreground, there is a black surveying instrument on a tripod with a blue strap. To its right, a red and black surveying tool is visible. The background is filled with various green and brown plants, including tall grasses and shrubs.	Description: Interior photo of Wetland 44

Photo #1 Wetland 1 [BSC Wetland FI-W1]	Location: Fitchburg, MA
	Description: Interior photo of Wetland 1
Photo #2 Stream 1/Sawmill Pond	Location: Fitchburg, MA
	Description: Stream 1/Sawmill Pond near flag BF B43-225
Photo #3 Wetland 3	Location: Fitchburg, MA
	Description: Wetland 3 near flag WF D1A-11

Photo #4 Wetland 4 [BSC Wetland FI-W3]	Location: Fitchburg, MA
	Description: Wetland 4 near flag WF B43-215
Photo #5 Wetland 5	Location: Fitchburg, MA
	Description: Wetland 5 near flag WF B42-101
Photo #6 Wetland 5/Potential Vernal Pool	Location: Fitchburg, MA
	Description: Potential vernal pool identified within Wetland 5

<p>Photo #7 Wetland 8</p> 	<p>Location: Fitchburg, MA Description: Wetland 8 near flag WF B32-203</p>
<p>Photo #8 Wetland 8</p> 	<p>Location: Fitchburg, MA Description: Wetland 8 near flag WF B32-112</p>
<p>Photo #9 Wetland 9 [BSC Wetland FI-W10]</p> 	<p>Location: Fitchburg, MA Description: Wetland 8 near flag WF B31-109</p>

Leominster, Massachusetts Photographs

This page intentionally left blank

Photo #1 Wetland 1 [BSC Wetland LE-W1]	Location: Leominster, MA
	Description: Wetland 1 near flag WF B36-108
Photo #2 Wetland 2 [BSC Wetland LE-W2]	Location: Leominster, MA
	Description: Wetland 2 near flag WF B35-98
Photo #3 Wetland 3	Location: Leominster, MA
	Description: Interior photo of Wetland 3

Photo #4 Wetland 4 [BSC Wetland LE-W3]	Location: Leominster, MA
 A photograph showing a wetland area with tall green grasses and reeds. In the background, there are power lines and a clear blue sky with some clouds.	Description: Wetland 4 near flag WF B30-106
Photo #5 Stream 1/Notown Reservoir	Location: Leominster, MA
 A photograph showing a view of a reservoir or stream. The water is calm and reflects the sky. There are trees and vegetation in the background and foreground.	Description: View of Notown Reservoir near flag WF B30-200
Photo #6 Wetland 5/Stream 2 [BSC Wetland LE-W4]	Location: Leominster, MA
 A photograph showing a stream flowing through a wetland area. The water is clear and surrounded by dense green vegetation and trees.	Description: Wetland 5 and Stream 2/Monoosnoc Brook near flag BF B12-100

Photo #7 Wetland 6/Stream 3	Location: Leominster, MA
	Description: Wetland 6 and Stream 3/Notown Reservoir near flag WF B28-109
Photo #8 Wetland 7 [BSC Wetland LE-W6]	Location: Leominster, MA
	Description: Interior photo of Wetland 7
Photo #9 Wetland 8 [BSC Wetland LE-W7]	Location: Leominster, MA
	Description: Wetland 8 near flag WF B26-110

Photo #10 Stream 4	Location: Leominster, MA
	Description: Stream 4 near flag BF B11-107
Photo #11 Wetland 9 [BSC Wetland LE-W8]	Location: Leominster, MA
	Description: Interior photo of Wetland 9
Photo #12 Wetland 10 [BSC Wetland LE-W9]	Location: Leominster, MA
	Description: Wetland 10 near flag WF B24-107

Photo #13 Wetland 11 [BSC Wetland LE-W10]	Location: Leominster, MA
	Description: Wetland 11 near flag WF B23-218
Photo #14 Wetland 12 [BSC Wetland LE-W11]	Location: Leominster, MA
	Description: Interior photo of Wetland 12
Photo #15 Stream 5	Location: Leominster, MA
	Description: Stream 5/Reservoir Brook near flag BF B10-212

Photo #16 Wetland 14 [BSC Wetland LE-W13]	Location: Leominster, MA
	Description: Interior photo of Wetland 14
Photo #17 Wetland 16 [BSC Wetland LE-W15]	Location: Leominster, MA
	Description: Wetland 16 near flag WF B19-109
Photo #18 Wetland 17 [BSC Wetland LE-W16]	Location: Leominster, MA
	Description: Interior photo of Wetland 17

Photo #19 Wetland 18 [BSC Wetland LE-W17]	Location: Leominster, MA
	Description: Interior photo of Wetland 18
Photo #20 Wetland 19 [BSC Wetland LE-W18/19]	Location: Leominster, MA
	Description: Wetland 19 near flag WF B16-117
Photo #21 Wetland 20/Fall Brook Reservoir	Location: Leominster, MA
	Description: View of Wetland 20 and Fall Brook Reservoir near flag WF B16-107

<p>Photo #22 Wetland 21 [BSC Wetland LE-W20]</p> 	<p>Location: Leominster, MA</p> <p>Description: Interior photo of Wetland 21</p>
<p>Photo #23 Wetland 22/Stream 8 [BSC Wetland LE-W21]</p> 	<p>Location: Leominster, MA</p> <p>Description: Wetland 22 and Stream 8 near flag BF S8-207</p>
<p>Photo #24 Wetland 23 [BSC Wetland LE-W23]</p> 	<p>Location: Leominster, MA</p> <p>Description: Wetland 22 near flag WF C13-13</p>

Photo #25 Wetland 24 [BSC Wetland LE-W23]	Location: Leominster, MA
	Description: Wetland 24 near flag WF C12-97
Photo #26 Stream 9	Location: Leominster, MA
	Description: Stream 9 near flag BF CS7-1
Photo #27 Wetland 25 [BSC Wetland LE-W24]	Location: Leominster, MA
	Description: Wetland 25 near flag WF C10A-13

Photo #28 Stream 10	Location: Leominster, MA
 A photograph of a narrow stream flowing through a wooded area. The water is dark and reflects the surrounding trees. The banks are lined with various trees and shrubs, some with bare branches and others with green leaves.	Description: Stream 10 near flag BF CS6-10
Photo #29 Wetland 27/Stream 11	Location: Leominster, MA
 A photograph of a wetland area with a stream. The foreground is dominated by tall green grasses and ferns. In the background, there is a large metal tower structure. A red box with the text "[BSC Wetland LE-W27]" is overlaid on the image. <p>[BSC Wetland LE-W27]</p>	Description: Wetland 27 and Stream 11 near flag BF CS5-6A
Photo #30 Wetland 29 [BSC Wetland LE-W28]	Location: Leominster, MA
 A photograph of a wetland area with a stream. The foreground is dominated by tall, thin, bare trees and shrubs. A pink ribbon is tied around one of the trees. The water is visible in the background. <p>[BSC Wetland LE-W28]</p>	Description: Wetland 29 near flag WF C7-13

Photo #31 Wetland 30 [BSC Wetland LE-W29]	Location: Leominster, MA
	Description: Interior photo of Wetland 30
Photo #32 Wetland 31	Location: Leominster, MA
	Description: Wetland 31 near flag WF C5-D15
Photo #33 Wetland 33 [BSC Wetland LE-W31]	Location: Leominster, MA
	Description: Wetland 33 near flag WF 5B-2

Photo #34 Wetland 34 [BSC Wetland LE-W33]	Location: Leominster, MA
	Description: Interior photo of Wetland 34
Photo #35 Wetland 35 [BSC Wetland LE-W34]	Location: Leominster, MA
	Description: Interior photo of Wetland 35

Sterling, Massachusetts Photographs

This page intentionally left blank

Photo #1 Wetland 1 [BSC Wetland ST-W1]	Location: Sterling, MA
 A photograph showing a wetland area with dense, tall grasses and some green plants in the foreground. The background consists of a wooded area with trees.	Description: Wetland 1 near flag WF C2-3A
Photo #2 Wetland 2 [BSC Wetland ST-W2]	Location: Sterling, MA
 A photograph of a wetland area with tall, dry grasses in the foreground. In the background, there are utility poles and a building under a blue sky with some clouds.	Description: Wetland 2 near flag WF C1A-45
Photo #3 Stream 1	Location: Sterling, MA
 A photograph of a stream flowing through a wooded area. The water is dark and surrounded by dense vegetation and trees.	Description: Stream 1 near flag BF C1-12

Attachment C – Wetland Determination Data Forms

This page intentionally left blank.

**A1/B2 ACR Project
Wetland Determination Data Form MA**

WARWICK, MA

WETLAND DETERMINATION DATA FORM – Northcentral and Northeast Region

Project/Site: _____ City/County: _____ Sampling Date: _____
 Applicant/Owner: _____ State: _____ Sampling Point: _____
 Investigator(s): _____ Section, Township, Range: _____
 Landform (hillslope, terrace, etc.): _____ Local relief (concave, convex, none): _____ Slope (%): _____
 Subregion (LRR or MLRA): _____ Lat: _____ Long: _____ Datum: _____
 Soil Map Unit Name: _____ NWI classification: _____

Are climatic / hydrologic conditions on the site typical for this time of year? Yes _____ No _____ (If no, explain in Remarks.)
 Are Vegetation _____, Soil _____, or Hydrology _____ significantly disturbed? Are "Normal Circumstances" present? Yes _____ No _____
 Are Vegetation _____, Soil _____, or Hydrology _____ naturally problematic? (If needed, explain any answers in Remarks.)

SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes _____ No _____ Hydric Soil Present? Yes _____ No _____ Wetland Hydrology Present? Yes _____ No _____	Is the Sampled Area within a Wetland? Yes _____ No _____ If yes, optional Wetland Site ID: _____
Remarks: (Explain alternative procedures here or in a separate report.) 	

HYDROLOGY

Wetland Hydrology Indicators: <u>Primary Indicators (minimum of one is required; check all that apply)</u> ___ Surface Water (A1) ___ Water-Stained Leaves (B9) ___ High Water Table (A2) ___ Aquatic Fauna (B13) ___ Saturation (A3) ___ Marl Deposits (B15) ___ Water Marks (B1) ___ Hydrogen Sulfide Odor (C1) ___ Sediment Deposits (B2) ___ Oxidized Rhizospheres on Living Roots (C3) ___ Drift Deposits (B3) ___ Presence of Reduced Iron (C4) ___ Algal Mat or Crust (B4) ___ Recent Iron Reduction in Tilled Soils (C6) ___ Iron Deposits (B5) ___ Thin Muck Surface (C7) ___ Inundation Visible on Aerial Imagery (B7) ___ Other (Explain in Remarks) ___ Sparsely Vegetated Concave Surface (B8)	<u>Secondary Indicators (minimum of two required)</u> ___ Surface Soil Cracks (B6) ___ Drainage Patterns (B10) ___ Moss Trim Lines (B16) ___ Dry-Season Water Table (C2) ___ Crayfish Burrows (C8) ___ Saturation Visible on Aerial Imagery (C9) ___ Stunted or Stressed Plants (D1) ___ Geomorphic Position (D2) ___ Shallow Aquitard (D3) ___ Microtopographic Relief (D4) ___ FAC-Neutral Test (D5)
Field Observations: Surface Water Present? Yes _____ No _____ Depth (inches): _____ Water Table Present? Yes _____ No _____ Depth (inches): _____ Saturation Present? Yes _____ No _____ Depth (inches): _____ (includes capillary fringe)	Wetland Hydrology Present? Yes _____ No _____
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available: 	
Remarks:	

VEGETATION – Use scientific names of plants.

Sampling Point: _____

	Absolute % Cover	Dominant Species?	Indicator Status	
Tree Stratum (Plot size: _____)				Dominance Test worksheet: Number of Dominant Species That Are OBL, FACW, or FAC: _____ (A) Total Number of Dominant Species Across All Strata: _____ (B) Percent of Dominant Species That Are OBL, FACW, or FAC: _____ (A/B)

	Color (moist)	%	Color (moist)	%	Type ¹	Loc ²		

¹Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains. ²Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators:

- Histosol (A1)
- Histic Epipedon (A2)
- Black Histic (A3)
- Hydrogen Sulfide (A4)
- Stratified Layers (A5)
- Depleted Below Dark Surface (A11)
- Thick Dark Surface (A12)
- Sandy Mucky Mineral (S1)
- Sandy Gleyed Matrix (S4)
- Sandy Redox (S5)
- Stripped Matrix (S6)
- Dark Surface (S7) (LRR R, MLRA 149B)

- Polyvalue Below Surface (S8) (LRR R, MLRA 149B)
- Thin Dark Surface (S9) (LRR R, MLRA 149B)
- Loamy Mucky Mineral (F1) (LRR K, L)
- Loamy Gleyed Matrix (F2)
- Depleted Matrix (F3)
- Redox Dark Surface (F6)
- Depleted Dark Surface (F7)
- Redox Depressions (F8)

Indicators for Problematic Hydric Soils³:

- 2 cm Muck (A10) (LRR K, L, MLRA 149B)
- Coast Prairie Redox (A16) (LRR K, L, R)
- 5 cm Mucky Peat or Peat (S3) (LRR K, L, R)
- Dark Surface (S7) (LRR K, L)
- Polyvalue Below Surface (S8) (LRR K, L)
- Thin Dark Surface (S9) (LRR K, L)
- Iron-Manganese Masses (F12) (LRR K, L, R)
- Piedmont Floodplain Soils (F19) (MLRA 149B)
- Mesic Spodic (TA6) (MLRA 144A, 145, 149B)
- Red Parent Material (F21)
- Very Shallow Dark Surface (TF12)
- Other (Explain in Remarks)

³Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Sampling Point: _____

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth (inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type ¹	Loc ²		

¹Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains. ²Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators:

- Histosol (A1)
- Histic Epipedon (A2)
- Black Histic (A3)
- Hydrogen Sulfide (A4)
- Stratified Layers (A5)
- Depleted Below Dark Surface (A11)
- Thick Dark Surface (A12)
- Sandy Mucky Mineral (S1)
- Sandy Gleyed Matrix (S4)
- Sandy Redox (S5)
- Stripped Matrix (S6)
- Dark Surface (S7) (LRR R, MLRA 149B)

- Polyvalue Below Surface (S8) (LRR R, MLRA 149B)
- Thin Dark Surface (S9) (LRR R, MLRA 149B)
- Loamy Mucky Mineral (F1) (LRR K, L)
- Loamy Gleyed Matrix (F2)
- Depleted Matrix (F3)
- Redox Dark Surface (F6)
- Depleted Dark Surface (F7)
- Redox Depressions (F8)

Indicators for Problematic Hydric Soils³:

- 2 cm Muck (A10) (LRR K, L, MLRA 149B)
- Coast Prairie Redox (A16) (LRR K, L, R)
- 5 cm Mucky Peat or Peat (S3) (LRR K, L, R)
- Dark Surface (S7) (LRR K, L)
- Polyvalue Below Surface (S8) (LRR K, L)
- Thin Dark Surface (S9) (LRR K, L)
- Iron-Manganese Masses (F12) (LRR K, L, R)
- Piedmont Floodplain Soils (F19) (MLRA 149B)
- Mesic Spodic (TA6) (MLRA 144A, 145, 149B)
- Red Parent Material (F21)
- Very Shallow Dark Surface (TF12)
- Other (Explain in Remarks)

³Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Sampling Point: _____

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth (inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type ¹	Loc ²		

¹Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains. ²Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators:

- Histosol (A1)
- Histic Epipedon (A2)
- Black Histic (A3)
- Hydrogen Sulfide (A4)
- Stratified Layers (A5)
- Depleted Below Dark Surface (A11)
- Thick Dark Surface (A12)
- Sandy Mucky Mineral (S1)
- Sandy Gleyed Matrix (S4)
- Sandy Redox (S5)
- Stripped Matrix (S6)
- Dark Surface (S7) (LRR R, MLRA 149B)

- Polyvalue Below Surface (S8) (LRR R, MLRA 149B)
- Thin Dark Surface (S9) (LRR R, MLRA 149B)
- Loamy Mucky Mineral (F1) (LRR K, L)
- Loamy Gleyed Matrix (F2)
- Depleted Matrix (F3)
- Redox Dark Surface (F6)
- Depleted Dark Surface (F7)
- Redox Depressions (F8)

Indicators for Problematic Hydric Soils³:

- 2 cm Muck (A10) (LRR K, L, MLRA 149B)
- Coast Prairie Redox (A16) (LRR K, L, R)
- 5 cm Mucky Peat or Peat (S3) (LRR K, L, R)
- Dark Surface (S7) (LRR K, L)
- Polyvalue Below Surface (S8) (LRR K, L)
- Thin Dark Surface (S9) (LRR K, L)
- Iron-Manganese Masses (F12) (LRR K, L, R)
- Piedmont Floodplain Soils (F19) (MLRA 149B)
- Mesic Spodic (TA6) (MLRA 144A, 145, 149B)
- Red Parent Material (F21)
- Very Shallow Dark Surface (TF12)
- Other (Explain in Remarks)

³Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

HYDROLOGY

Wetland Hydrology Indicators: <u>Primary Indicators (minimum of one is required; check all that apply)</u> ___ Surface Water (A1) ___ Water-Stained Leaves (B9) ___ High Water Table (A2) ___ Aquatic Fauna (B13) ___ Saturation (A3) ___ Marl Deposits (B15) ___ Water Marks (B1) ___ Hydrogen Sulfide Odor (C1) ___ Sediment Deposits (B2) ___ Oxidized Rhizospheres on Living Roots (C3) ___ Drift Deposits (B3) ___ Presence of Reduced Iron (C4) ___ Algal Mat or Crust (B4) ___ Recent Iron Reduction in Tilled Soils (C6) ___ Iron Deposits (B5) ___ Thin Muck Surface (C7) ___ Inundation Visible on Aerial Imagery (B7) ___ Other (Explain in Remarks) ___ Sparsely Vegetated Concave Surface (B8)	<u>Secondary Indicators (minimum of two required)</u> ___ Surface Soil Cracks (B6) ___ Drainage Patterns (B10) ___ Moss Trim Lines (B16) ___ Dry-Season Water Table (C2) ___ Crayfish Burrows (C8) ___ Saturation Visible on Aerial Imagery (C9) ___ Stunted or Stressed Plants (D1) ___ Geomorphic Position (D2) ___ Shallow Aquitard (D3) ___ Microtopographic Relief (D4) ___ FAC-Neutral Test (D5)
Field Observations: Surface Water Present? Yes _____ No _____ Depth (inches): _____ Water Table Present? Yes _____ No _____ Depth (inches): _____ Saturation Present? Yes _____ No _____ Depth (inches): _____ (includes capillary fringe)	Wetland Hydrology Present? Yes _____ No _____
Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available: 	
Remarks:	

VEGETATION – Use scientific names of plants.

Sampling Point: _____

Tree Stratum (Plot size: _____)	Absolute % Cover	Dominant Species?	Indicator Status	
1. _____	_____	_____	_____	Dominance Test worksheet: Number of Dominant Species That Are OBL, FACW, or FAC: _____ (A) Total Number of Dominant Species Across All Strata: _____ (B) Percent of Dominant Species That Are OBL, FACW, or FAC: _____ (A/B)
2. _____	_____	_____	_____	
3. _____	_____	_____	_____	
4. _____	_____	_____	_____	
5. _____	_____	_____	_____	
6. _____	_____	_____	_____	
7. _____	_____	_____	_____	
_____ = Total Cover				Prevalence Index worksheet: Total % Cover of: _____ Multiply by: _____ OBL species _____ x 1 = _____ FACW species _____ x 2 = _____ FAC species _____ x 3 = _____ FACU species _____ x 4 = _____ UPL species _____ x 5 = _____ Column Totals: _____ (A) _____ (B) Prevalence Index = B/A = _____
Sapling/Shrub Stratum (Plot size: _____)	1. _____	_____	_____	
2. _____	_____	_____	_____	
3. _____	_____	_____	_____	
4. _____	_____	_____	_____	
5. _____	_____	_____	_____	
6. _____	_____	_____	_____	
7. _____	_____	_____	_____	
_____ = Total Cover				Hydrophytic Vegetation Indicators: <input type="checkbox"/> Rapid Test for Hydrophytic Vegetation <input type="checkbox"/> Dominance Test is >50% <input type="checkbox"/> Prevalence Index is ≤3.0 ¹ <input type="checkbox"/> Morphological Adaptations ¹ (Provide supporting data in Remarks or on a separate sheet) <input type="checkbox"/> Problematic Hydrophytic Vegetation ¹ (Explain) ¹ Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic.
Herb Stratum (Plot size: _____)	1. _____	_____	_____	
2. _____	_____	_____	_____	
3. _____	_____	_____	_____	
4. _____	_____	_____	_____	
5. _____	_____	_____	_____	
6. _____	_____	_____	_____	
7. _____	_____	_____	_____	
8. _____	_____	_____	_____	
9. _____	_____	_____	_____	
10. _____	_____	_____	_____	
11. _____	_____	_____	_____	
12. _____	_____	_____	_____	
_____ = Total Cover				Definitions of Vegetation Strata: Tree – Woody plants 3 in. (7.6 cm) or more in diameter at breast height (DBH), regardless of height. Sapling/shrub – Woody plants less than 3 in. DBH and greater than 3.28 ft (1 m) tall. Herb – All herbaceous (non-woody) plants, regardless of size, and woody plants less than 3.28 ft tall. Woody vines – All woody vines greater than 3.28 ft in height.
Woody Vine Stratum (Plot size: _____)	1. _____	_____	_____	
2. _____	_____	_____	_____	
3. _____	_____	_____	_____	
4. _____	_____	_____	_____	
_____ = Total Cover				Hydrophytic Vegetation Present? Yes _____ No _____
Remarks: (Include photo numbers here or on a separate sheet.)				

SOIL

Sampling Point: _____

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)								
Depth (inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type ¹	Loc ²		

¹Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains. ²Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators:

- Histosol (A1)
- Histic Epipedon (A2)
- Black Histic (A3)
- Hydrogen Sulfide (A4)
- Stratified Layers (A5)
- Depleted Below Dark Surface (A11)
- Thick Dark Surface (A12)
- Sandy Mucky Mineral (S1)
- Sandy Gleyed Matrix (S4)
- Sandy Redox (S5)
- Stripped Matrix (S6)
- Dark Surface (S7) (**LRR R, MLRA 149B**)

- Polyvalue Below Surface (S8) (**LRR R, MLRA 149B**)
- Thin Dark Surface (S9) (**LRR R, MLRA 149B**)
- Loamy Mucky Mineral (F1) (**LRR K, L**)
- Loamy Gleyed Matrix (F2)
- Depleted Matrix (F3)
- Redox Dark Surface (F6)
- Depleted Dark Surface (F7)
- Redox Depressions (F8)

Indicators for Problematic Hydric Soils³:

- 2 cm Muck (A10) (**LRR K, L, MLRA 149B**)
- Coast Prairie Redox (A16) (**LRR K, L, R**)
- 5 cm Mucky Peat or Peat (S3) (**LRR K, L, R**)
- Dark Surface (S7) (**LRR K, L**)
- Polyvalue Below Surface (S8) (**LRR K, L**)
- Thin Dark Surface (S9) (**LRR K, L**)
- Iron-Manganese Masses (F12) (**LRR K, L, R**)
- Piedmont Floodplain Soils (F19) (**MLRA 149B**)
- Mesic Spodic (TA6) (**MLRA 144A, 145, 149B**)
- Red Parent Material (F21)
- Very Shallow Dark Surface (TF12)
- Other (Explain in Remarks)

³Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Restrictive Layer (if observed):

Type: _____
 Depth (inches): _____

Hydric Soil Present? Yes No

Remarks:

WETLAND DETERMINATION DATA FORM – Northcentral and Northeast Region

Project/Site: _____ City/County: _____ Sampling Date: _____
 Applicant/Owner: _____ State: _____ Sampling Point: _____
 Investigator(s): _____ Section, Township, Range: _____
 Landform (hillslope, terrace, etc.): _____ Local relief (concave, convex, none): _____ Slope (%): _____
 Subregion (LRR or MLRA): _____ Lat: _____ Long: _____ Datum: _____
 Soil Map Unit Name: _____ NWI classification: _____

Are climatic / hydrologic conditions on the site typical for this time of year? Yes _____ No _____ (If no, explain in Remarks.)
 Are Vegetation _____, Soil _____, or Hydrology _____ significantly disturbed? Are "Normal Circumstances" present? Yes _____ No _____
 Are Vegetation _____, Soil _____, or Hydrology _____ naturally problematic? (If needed, explain any answers in Remarks.)

SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes _____ No _____ Hydric Soil Present? Yes _____ No _____ Wetland Hydrology Present? Yes _____ No _____	Is the Sampled Area within a Wetland? Yes _____ No _____ If yes, optional Wetland Site ID: _____
Remarks: (Explain alternative procedures here or in a separate report.)
